RESEARCH CONTEXT

HP Labs' Open Innovation Office pursues and coordinates research collaborations with top researchers and entrepreneurs in academia, government and business around the world.

It ensures joint research endeavors result in high-impact research that meets HP and its partners' scientific and business objectives.

The office consists of a global team, bringing together expertise from around the world to foster discovery and address important issues; connecting the world's leading researchers, scientists, and entrepreneurs through ground-breaking programs; and collaborating with them to tackle the next generation of breakthrough technologies.
